

Git

Ignoring certain files via " .gitignore "

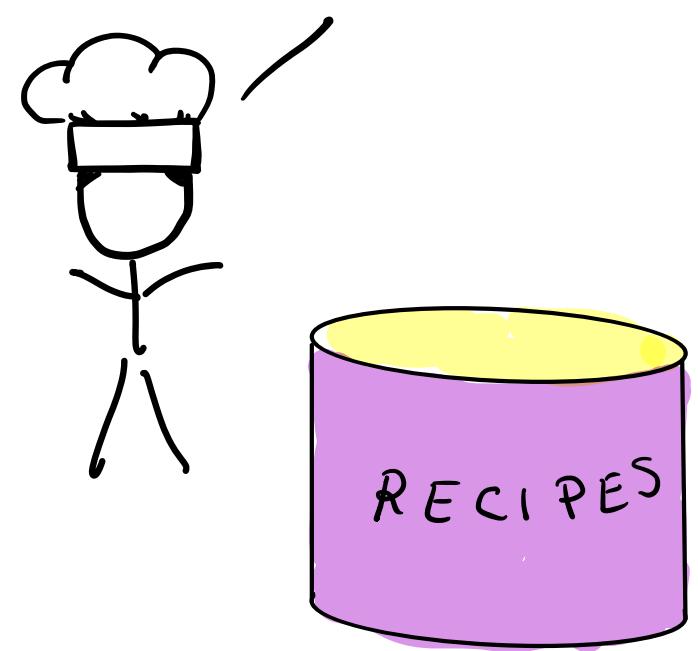

by Sandy Bultera
© 2022

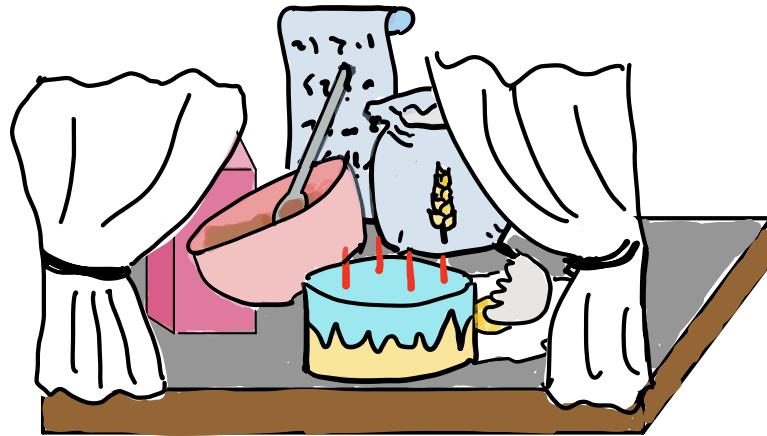

disclaimer: this will tell you what you need
to do, not how to do it.

I WANT TO SAVE
EACH OF MY CHANGES
TO MY RECIPE

FIRST, LET ME
CREATE A
REPOSITORY

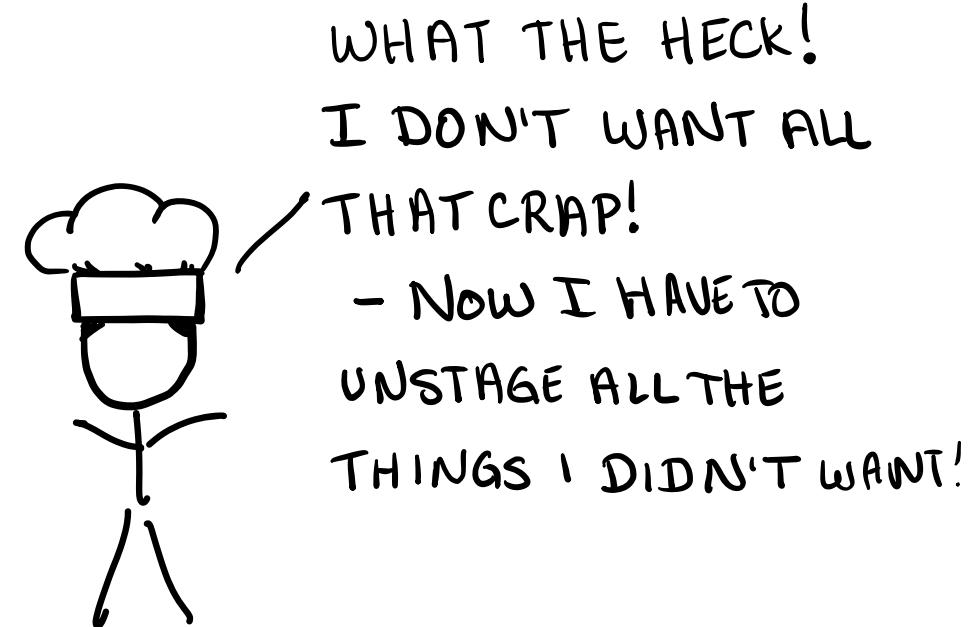

NEXT, WE NEED TO
STAGE OUR CHANGES

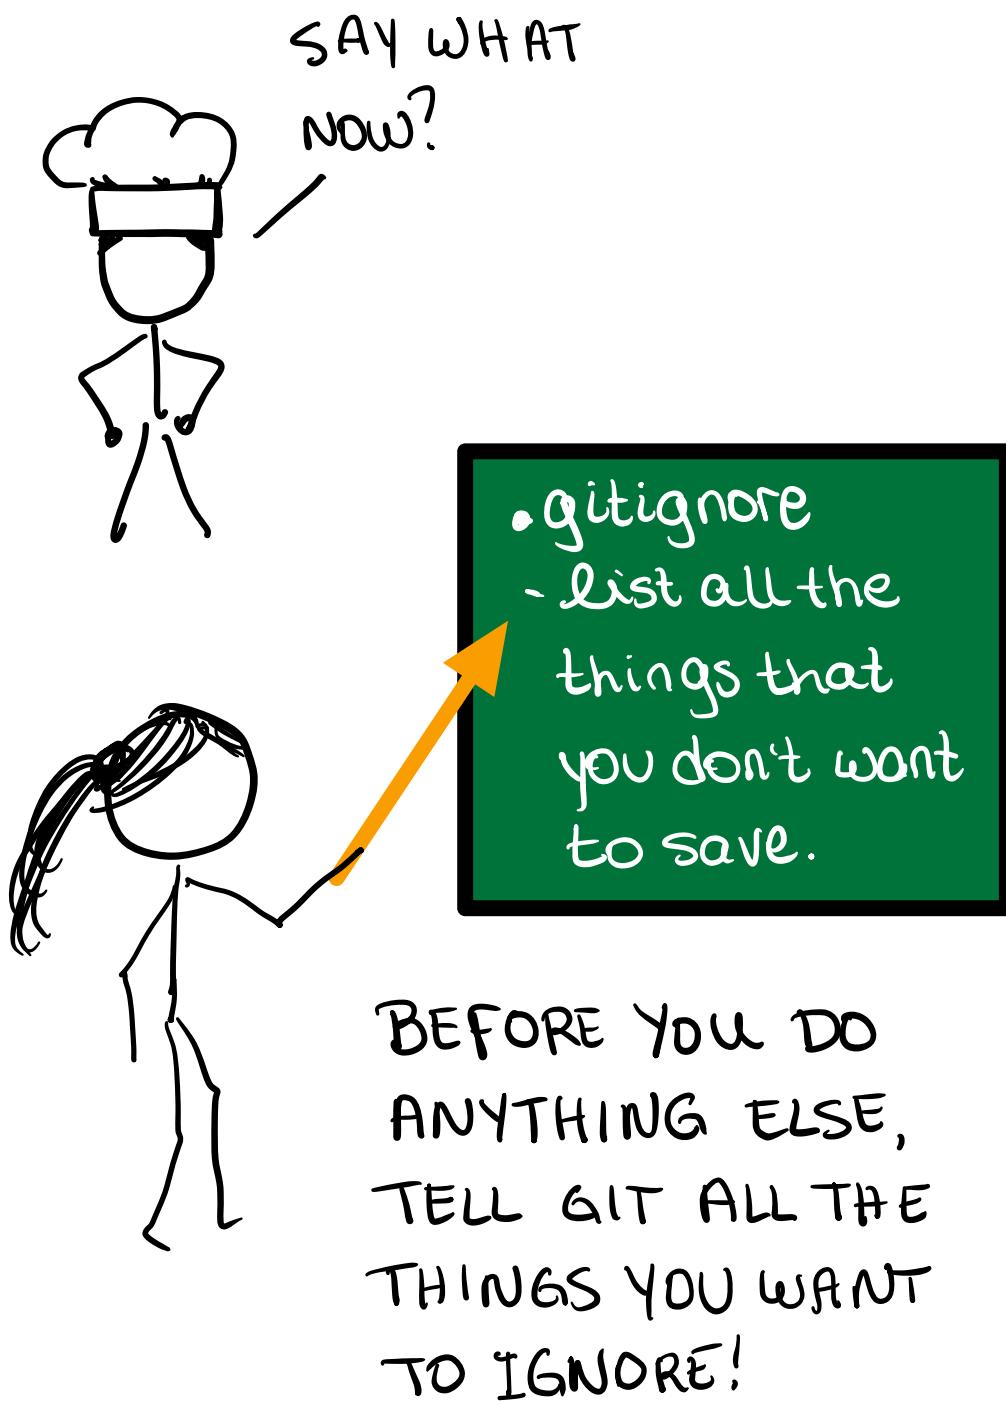

GIT IS
A MESS!

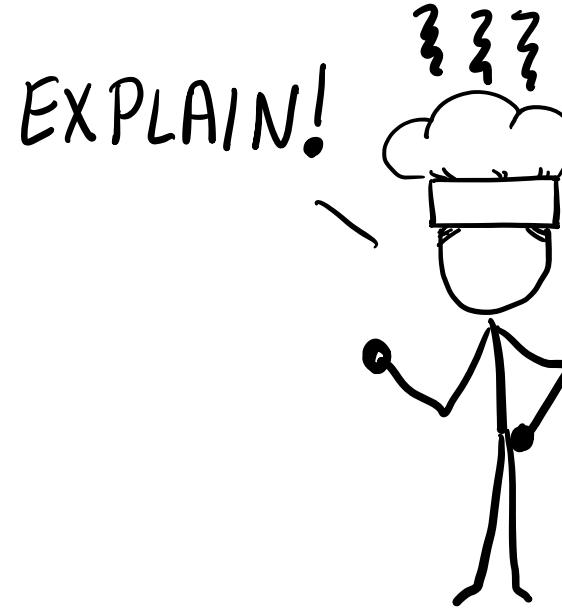

WHOA!! DON'T
GIVE UP SO FAST.
USE
•GITIGNORE

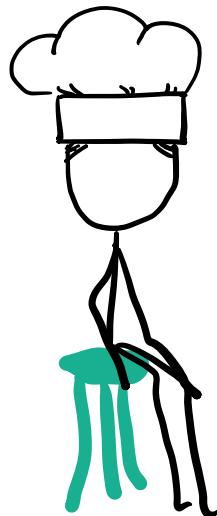

KINDA?
SORTA?
IT WOULD
WORK
SOMETIMES

EXPLAIN!

YOU SEE THIS PINK BOWL?
IF YOU TELL GIT TO IGNORE IT,
IT WILL, BUT WHAT ABOUT A
BLUE BOWL, OR A RED BOWL.
IT WOULD BE A LOT OF EFFORT
TO LIST ALL YOUR BOWLS.

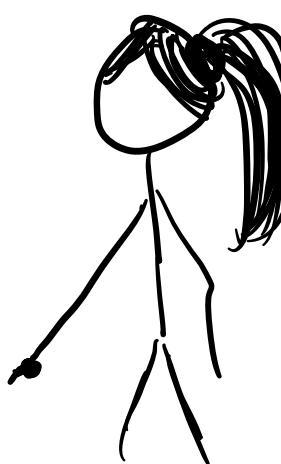

GO ON...
I'M LISTENING

LET'S ORGANIZE
STUFF BY "TYPE"
FOR EXAMPLE

DISHES

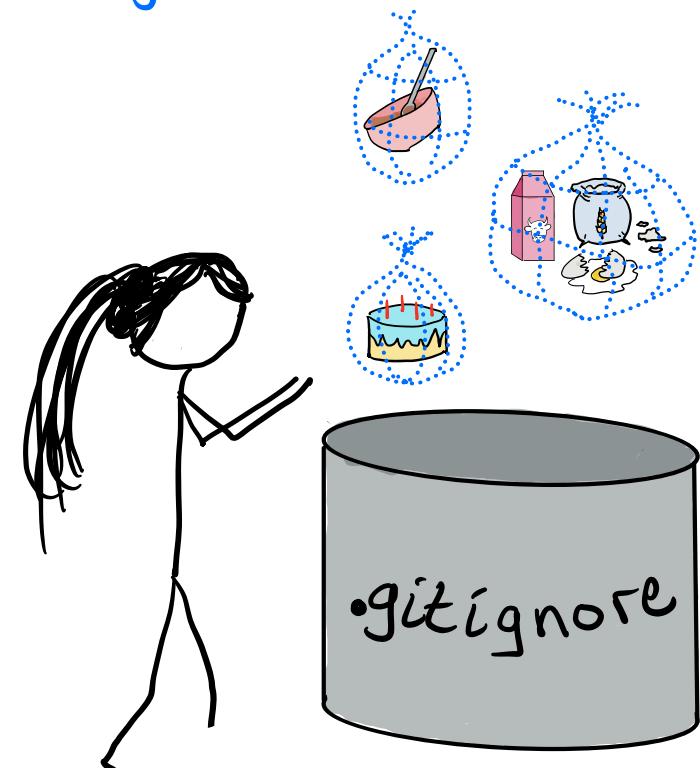

INGREDIENTS

RESULTS

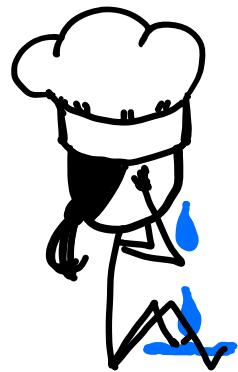

SO, YOU TELL GIT TO
IGNORE *.dishes,
*.ingredients, and *.results

BUT EVEN THIS
IS NOT THE END
OF THE STORY

... great drama ensues ...

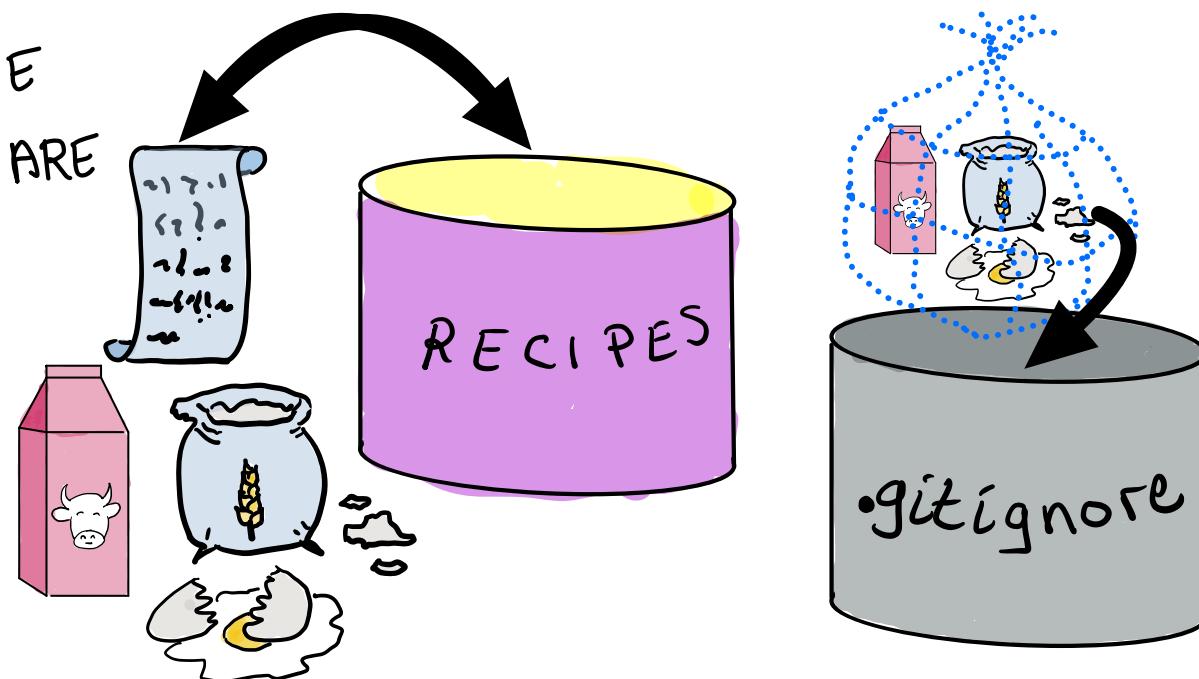

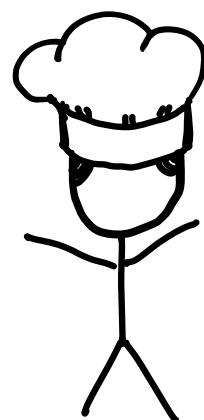

NO MATTER
WHAT I DO,
IT'S NOT
WORKING

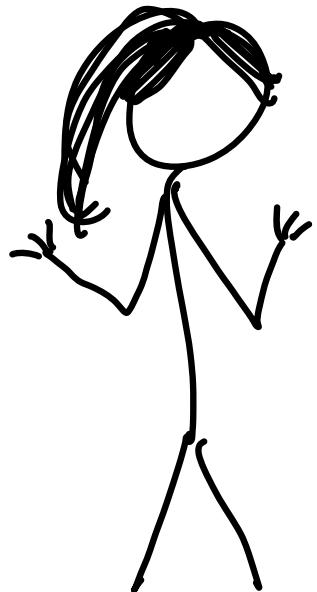

SO WHAT'S
WRONG?

EVERY TIME I PUT
STUFF IN OR TAKE
STUFF OUT OF
THE REPO, THE
INGREDIENTS ARE
INCLUDED

EVEN THOUGH IT'S
NOT SUPPOSED TO!

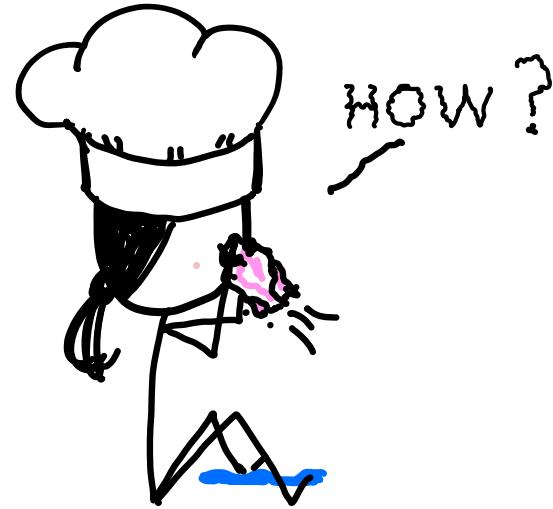

THE LIST OF THINGS
IN GIT IGNORE WILL
ONLY BE IGNORED
IF THEY NOT ALREADY
IN THE REPO

I AM SO SORRY, I
DID NOT EXPLAIN
CLEARLY

THE GOOD NEWS
IS THAT IT CAN
BE FIXED!

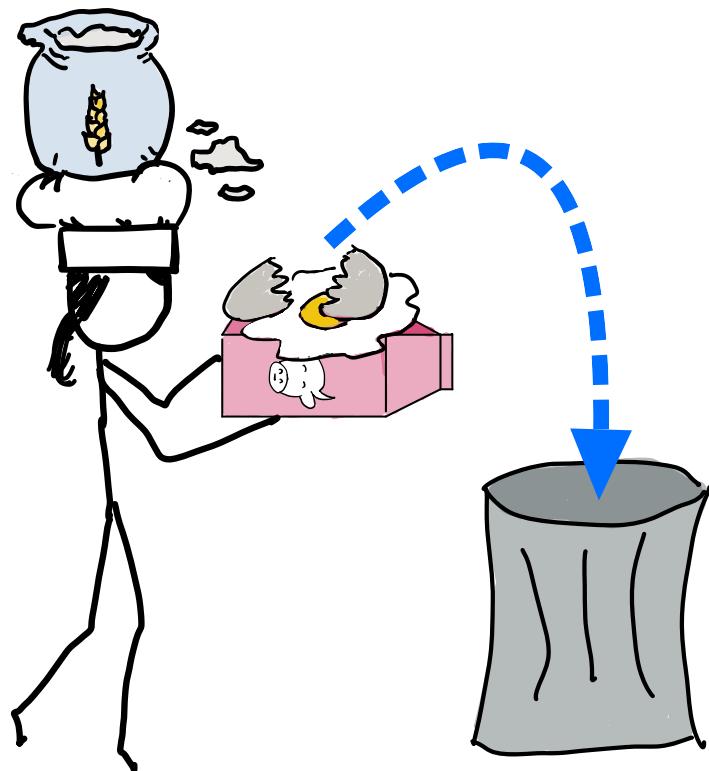

YOU HAVE TO MANUALLY
REMOVE ALL UNWANTED
STUFF FROM
THE REPO

KEEP?
OR TOSS?

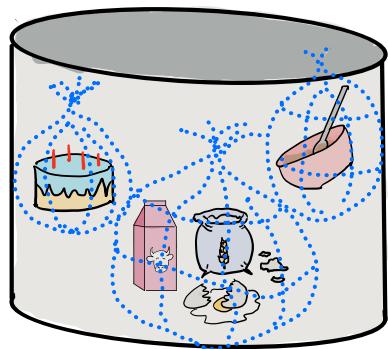

FINALLY,
ALL
CLEAN

LET'S TRY
THIS AGAIN

.GITIGNORE IS
GOOD ✓

REPO IS CLEAN ✓

ONLY THE
RECIPE GETS
UPDATED ✓

the
end
